

JELILAT OLUWATOSIN ABDULLATEEF

Professional Summary

I'm a business operation and data professional with experience across data analytics, product management, virtual assistance, account management, and client support. I help businesses solve problems through data, improve digital products, streamline business operations, and support business growth. I have experience working with startups, cross-functional teams, and international clients through both full-time and freelance roles.

Work Experience <https://jelilat25.github.io>

FREELANCE BUSINESS OPERATIONS AND DATA PROFESSIONAL – UpWork

April 2024 – Present

- Delivered data analytics, business research, and reporting solutions for international clients across industries, maintaining strong client satisfaction through high-quality project delivery.
- Built interactive Power BI dashboards for **Kugler Services LLC**, transforming financial data into actionable insights that improved cash flow visibility and supported business decision-making.
- Conducted market and competitor research, structured, and analyzed large datasets for **Taste DNA**, creating a reliable restaurant and menu database that supported the development of the client's food discovery mobile application.
- Collaborated directly with clients to gather requirements, define project scope, communicate progress, and deliver solutions that met business objectives on time.
- Analyzed employee wellness and retention data for a client, leveraging Python and Excel to evaluate the impact of wellness day utilization on retention trends, and delivered data-driven recommendations through a PowerPoint presentation.

PRODUCT ANALYST – CR Equity AI

July 2024 – July 2026

- Managed and prioritized Jira tickets, improving task visibility and enabling developers and stakeholders to track product progress more efficiently.
- Executed end-to-end functional and user acceptance testing (UAT) across web platform features, identifying defects before release and contributing to a more reliable user experience.
- Designed and configured Zoho SalesIQ chatbot workflows, streamlining customer onboarding and enabling users to navigate the platform with less manual support.
- Documented product workflows, standard operating procedures (SOPs), and feature requirements, improving knowledge sharing and reducing onboarding time for new team members.
- Collaborated with cross-functional teams to validate new features, report bugs, and recommend product improvements that aligned with business and user requirements.
- Supported platform implementation by training internal team members and users, increasing product adoption through clear documentation and hands-on guidance.
- Assisted in integrating business processes across Zoho applications, helping improve workflow automation and operational efficiency.

ACCOUNT MANAGER – Perpetuum Designs

June 2025 – September 2025

- Engaged new clients through calls and emails, using communication skills to introduce design services.

- Managed client follow-ups and updates, applying CRM and interpersonal skills to support project delivery.
- Supported sales activities by identifying potential opportunities and scheduling discovery calls.

BUSINESS ANALYST – Venture for Africa

February 2025 – May 2025

- Researched and analyzed 150+ companies using LinkedIn and public reports, shortlisting 30 high-potential partners.
- Created a sponsorship tracker in Google Sheets, making data collection and tracking easier for the team.
- Presented findings and recommendations through structured reports and stakeholder sessions.

DATA VISUALIZATION ANALYST – Excelerate

December 2024 - April 2025

- Led a data team to assess Facebook ad campaign performance using Excel, identifying four low-performing ads to recommend for discontinuation.
- Analyzed Reach, CTR, and CPR metrics to deliver cost-saving insights and improve ad targeting strategy for GlobalShala's Superhero U event'

DATA ANALYST INTERN – Intern Career (Virtual Internship)

January 2024 – August 2024

- Conducted a global terrorism analysis project (1979–2017) using Excel and Power BI, creating an interactive dashboard to uncover trends and actionable insights
- comprehensive analysis of top 1000 YouTube streamers using Python libraries (Pandas, Seaborn, Matplotlib), uncovering trends that optimized audience engagement strategies by 15%

DATA ANALYST INTERN – MeriSKILL (Internship Program)

December 2023 – April 2024

- Conducted sales data analysis using Power BI and Excel to identify trends, improve forecasting, and generate actionable insights
- Explored employee turnover through the HR Attrition Project, using SQL, Excel, and Power BI to analyze retention trends and design data-driven recommendations for HR interventions

MATHEMATICS TEACHER – Crownford Model School

February 2020 – November 2022

- Improved students' math performance through personalized lessons.
- Trained students for math competitions with strong performance outcomes
